Test Progress Report

Version: SAIP 1.1.0
Prepared by: Robert Grzonka
Date: September 30, 2025

1. Summary:

Reporting Period: July 1, 2025 → September 30, 2025

Environment: Test environment
`http://gp-saip-portals-website-frontend-v3.test.internal.saip.gov.sa/`

Tech Stack:

- Frontend: Next.js 15
- Backend: Drupal 10
- Languages: Bilingual AR/EN with full RTL support

Test Coverage:

- 42 spec files, 406 tests, ~22.45% coverage
- Framework: Vitest + React Testing Library + JSDOM
- 16 test suites covering atomic components
- Molecular tests in development/ready for merge

Scope Covered This Period:

Services Menu:

- Plants varieties
- IP enablement: IP academy, IP clinics, National network of IP support centers
- IP enforcement: IP infringement, General secretariat of IP dispute resolution committees

Resources Menu:

- Resources overview
- IP Information: Digital guide, IP Guidelines, FAQs, IP glossary, Reports

Tools and Research:

- IP search engine, Gazette, Publications, IP observatory, Open data

Test Methodology:

- **Performance:** 3 consecutive Lighthouse runs per page per locale per device profile (median recorded)
- **Accessibility:** Storybook accessibility checks + page-level axe checks + manual NVDA passes
- **Responsive:** Fixed breakpoint sweeps at 320, 375, 768, 1024, 1440 including RTL

- **DGA Compliance:** RTL, landmarks, contrast verification

Key Results:

- ✅ **Accessibility:** No critical WCAG 2.1 A/AA violations on tested pages
- ✅ **DGA Compliance:** RTL verified, semantics aligned, keyboard navigation complete
- ✅ **Unit Tests:** Stable atomic suites, utilities and hooks coverage expanded
- ⚠ **Defects:** 68 UI/responsive issues identified and logged

---

2. Test Execution Status:

Test Cycle name: SAIP Jul-Sep 2025 - Services, Resources, Tools & Research Coverage

Automated Unit Tests

Total Test Cases	Executed	Passed	Blocked	Failed
406	406	402	0	4

Test Framework: Vitest + React Testing Library + JSDOM
Coverage: ~22.45% (42 spec files covering atomic and molecular components)
Status: All automated unit tests executed successfully in CI/CD pipeline

Manual Testing

Scope: Comprehensive manual testing of UI/UX, design system compliance, and functional flows
Pages Tested: Services, Resources, Tools & Research, About, Homepage, National IP Strategy, Projects, Organizational Structure, Entities & Partners, Contact & Support
Test Types: Visual design verification, interaction testing, responsive layout validation, cross-browser compatibility
Bugs Identified: 68 issues across typography, layout, component implementation, and functionality

Bug Breakdown:

- High Priority: 7 bugs (Navigation & Button Functionality issues)
- Medium Priority: 54 bugs (Typography, Layout, Component Styling)
- Low Priority: 7 bugs (Minor visual inconsistencies)

Testing Tools: Chrome DevTools, Firefox DevTools, Figma design comparison, manual keyboard navigation, screen size testing

---

3. Defect Summary

Priority	Under development	Test Passed	Test Failed
Highest	0	0	0
High	0	0	0
Medium	4	0	4

Priority	Under development	Test Passed	Test Failed
Low	0	0	0
Lowest	0	0	0
Total	**4**	**0**	**4**

4. Risks and Issues:

Technical Debt and Test Quality

Snapshot flakiness in components with dynamic dates and viewport

- *Impact:* Test reliability and maintenance overhead
- *Mitigation:* Migrate to semantic assertions; mock time and viewport

Test coverage at 22.45% vs. target of ≥35%

- *Impact:* Reduced confidence in regression detection
- *Mitigation:* Prioritize coverage for shared utilities, hooks, and high-usage molecules in next sprint

Spinner and Grid components require refactoring

- *Impact:* Order-dependent assertions causing false failures
- *Mitigation:* Align class application with design tokens

Environment and Scope Constraints

Stage environment excluded from this testing period

- *Risk:* Gaps in pre-production validation
- *Recommendation:* Include Stage in next test cycle

Authentication flows not tested

- Scope limited to public-facing pages without authentication
- *Risk:* Login, user profile, and protected content flows unverified
- *Recommendation:* Expand scope to authenticated journeys

Accessibility and DGA Continuous Improvement

Heading hierarchy cleanup needed

- Long-form content articles need heading structure refinement
- *Action:* Enforce H1→H2→H3 order in CMS templates

Focus outline standardization in progress

- Inconsistent focus visibility across light/dark sections
- *Action:* Normalize focus outlines across buttons, links, and custom components

RTL minor aesthetic notes

- Minor directional icon alignment issues in RTL mode
- *Action:* Review icon mirroring logic

Link contrast adjustments

- Low-contrast hover states on some links
- *Action:* Adjust hover state colors for WCAG AA compliance

Content and CMS Dependencies

Alternative text and aria-labels needed

- New imagery in Resources/Reports sections missing labels
- *Owner:* Content team
- *Action:* Provide alt text guidelines and audit existing content

Form error message associations

- Error messages need aria-describedby linkage
- *Owner:* Development team
- *Action:* Verify implementation across form components

---

5. Bugs list:

Navigation & Button Functionality Issues

Bug #1: Unclear Functionality of "View Openings" and "Visit WIPO Careers" Buttons

Page: `/contact-us/careers`
Priority: High
Category: Functionality

Description:
The page contains two buttons — "View Openings" and "Visit WIPO Careers" — but it is unclear where these buttons are supposed to redirect the user. There is no description or indication of their destination, and clicking them either results in no action or leads to an undefined/incorrect page.

Expected Result:

- "View Openings" → should redirect to the current job openings page or internal careers list
- "Visit WIPO Careers" → should link to the official WIPO Careers website or external resource

---

Bug #2: Unclear Functionality of "Go to Beneficiary Support" Button

Page: `/contact-us/contact-and-support`
Priority: High
Category: Functionality

Description:
The page includes a "Go to Beneficiary Support" button, but it is not clear where this button is supposed to

redirect the user. There is no description, tooltip, or visible indication of its target, and clicking it either leads to an undefined page or performs no action.

Expected Result:
The "Go to Beneficiary Support" button should redirect the user to the Beneficiary Support section or contact page, and include a label explaining its purpose.

Bug #3: Unclear Functionality of "Go to IP Gazette" and "Go to IP Newspaper" Buttons

Page: `/resources/tools-and-research/gazette`
Priority: High
Category: Functionality

Description:
On the page, there are two buttons — "Go to IP Gazette" and "Go to IP Newspaper" — but it's unclear where these buttons are supposed to redirect the user. Clicking them either does nothing or leads to an undefined page.

Expected Result:

- "Go to IP Gazette" → should lead to the official IP Gazette section
- "Go to IP Newspaper" → should lead to the IP Newspaper page or archive

---

Bug #4: Non-Functional "Log in to TISC" and "View More Statistics" Buttons

Page: `/services/ip-support-centers`
Priority: High
Category: Functionality

Description:
The page displays two buttons — "Log in to TISC" and "View More Statistics" — but both appear to be non-functional. Clicking either button results in no action or redirects to an undefined page.

Expected Result:

- "Log in to TISC" → should redirect to the official TISC login portal
- "View More Statistics" → should open a detailed statistics page

---

Bug #5: Non-Functional "Go to Media to See More" Button

Page: `/saip/national-ip-strategy`
Priority: Medium
Category: Functionality

Description:
The "Go to Media to See More" button in the Latest News section does not work as expected. Clicking it does not redirect to the Media page or any other relevant content.

Expected Result:
The "Go to Media to See More" button should redirect the user to the Media section containing full news articles.

Bug #6: Non-Functional "View All" Buttons

Page: `/saip/entities-partners`
Priority: Medium
Category: Functionality

Description:
The page contains multiple "View All" buttons under different sections, but none are functional — clicking them does not trigger any navigation or reveal additional content.

Expected Result:
Each "View All" button should either redirect to a full list page or expand the section dynamically to display all items.

Bug #7: Non-Functional "Go to National Open Data Platform" Button

Page: `/resources/tools-and-research/open-data`
Priority: High
Category: Functionality

Description:
The page includes a "Go to National Open Data Platform" button, but it does not perform any action when clicked. There is no visible link or defined behavior.

Expected Result:
The button should properly redirect the user to the official National Open Data Platform or relevant open data access page.

About Page Issues

Bug #8: Incorrect Font Weight for Page Titles

Page: About SAIP page (all titles: About SAIP, Vision, Mission, Organization Structure)
Priority: Medium
Category: Typography

Description:
All page titles on this screen appear with incorrect font weight in the current development build. The titles look too light / not matching the design, resulting in visual inconsistency when compared to the approved UI design.

Expected Result:
All titles should use the correct font weight as specified in the design system (e.g., font-semibold, font-bold, or font-extrabold).

Bug #9: Breadcrumb Status Not Fully Implemented

Page: About SAIP page (and potentially other pages using the breadcrumb component)
Priority: Medium
Category: Component Implementation

Description:
The breadcrumb component on this page is not fully implemented in the development version. Missing elements may include: incorrect breadcrumb structure, missing hierarchy levels, missing arrow/divider icons, wrong font weight or spacing, non-clickable parent links, missing current page state indicator.

Expected Result:
Breadcrumb component should match the Figma design with all elements properly implemented.

Bug #10: Incorrect Color and Behavior for Non-Linked Breadcrumb Items

Page: About SAIP page (Breadcrumb component)
Priority: Medium
Category: Design System Compliance

Description:
The breadcrumb item "SAIP" does not have a linked page, so according to the design system (NDS), it should remain in default (non-clickable) status and use the On-Color (FFFFFF) when displayed on a non-white background. Issues observed: breadcrumb not applying correct On-Color (#FFFFFF), non-linked items always display default color, logic for color switching based on background appears missing.

Expected Result:
Non-linked breadcrumb items should use On-Color (#FFFFFF) when displayed on non-white backgrounds.

Bug #11: Incorrect Background Height in Development Version

Page: About SAIP page (Hero section / Header area)
Priority: Medium
Category: Layout

Description:
The background height on the page is incorrect in the development version. Common symptoms: background appears shorter/taller than intended, visual spacing between hero content and breadcrumb doesn't align, background doesn't match Figma height.

Expected Result:
Background height should match the exact Figma specification.

Bug #12: Navigation Bar Not Fixed on Scroll & Incorrect Animation

Page: Global Navigation Bar (All pages)
Priority: High
Category: User Experience

Description:
The navigation bar does not behave according to design specifications during scrolling. Two issues: (1) navigation bar is not fixed at the top once user starts scrolling, (2) sticky animation is incorrect compared to UI design behavior.

Expected Result:
Navigation bar should smoothly transition to fixed position with correct animation when scrolling.

Bug #13: Incorrect Color in "CEO Speech" Quote Component

Page: About → CEO Speech Section
Priority: Low
Category: Color

Description:
The quotation marks ("") icons inside the CEO Speech component are using an incorrect color in the Dev environment. Design requires a specific green shade from the NDS palette, but current implementation shows a different tone.

Expected Result:
Quotation marks should use the correct green shade from NDS palette.

Bug #14: Incorrect Image Size in CEO Section

Page: About → CEO Section
Priority: Medium
Category: Media

Description:
The CEO portrait image is displayed with incorrect sizing in the Dev environment. The image appears compressed, stretched, or scaled incorrectly, causing distortion and inconsistent visual presentation.

Expected Result:
CEO portrait image should maintain correct aspect ratio and dimensions as specified in Figma.

Bug #15: Incorrect Width and Height for "View All" Buttons

Page: `/saip/about` (and possibly other sections)
Priority: Low
Category: Component Sizing

Description:
The "View all" button does not match the width and height specified in the design. Button displays with incorrect dimensions (e.g., ~105 × 40px), resulting in inconsistencies.

Expected Result:
Button sizing should be consistent across all components and align with design specifications.

Bug #16: Responsibility Icons Have Incorrect Sizes

Page: About SAIP → Responsibilities section
Priority: Medium
Category: Component Sizing

Description:
Icons inside the responsibilities cards do not match design system requirements. Icon size is incorrect and green container background size is incorrect.

Expected Result:

- Icon size: 24px
- Green container: 48px × 48px
- Proper alignment and spacing between icon and text

Bug #17: Shadow Appears on Responsibility Cards, but the Design Has No Shadow

Page: About SAIP → Responsibilities section
Priority: Low
Category: Visual Design

Description:
The responsibility cards on the About page display a drop shadow in Dev version. According to design, these cards should NOT have any shadow — they must have a flat, clean appearance.

Expected Result:
Remove all box-shadow styles from the responsibility cards to match the flat style used in the design system.

Bug #18: Responsibility Card Container Size Is Incorrect

Page: About SAIP → Responsibilities section
Priority: Medium
Category: Layout

Description:
The size (width/height) of the responsibility cards does not match Figma specification. Spacing, padding, and overall container dimensions differ from the design.

Expected Result:
Container dimensions must match precise values from Figma. Ensure consistent padding, correct grid alignment, and apply uniform height across all cards.

Bug #19: Strategy Card Height Is Incorrect in Dev

Page: About Page — "Strategic Pillars" section
Priority: Medium
Category: Layout

Description:
The height of the strategic pillar cards does not match design specifications. In Dev, card height is 350px, but design specifies different height. Layout looks compressed and spacing between card elements appears inconsistent.

Expected Result:
Card height must match Figma design exactly. All four cards must have consistent dimensions for unified grid layout.

Footer Issues

Bug #20: Footer – Layout & Spacing Issues

Page: Global Footer (All pages)
Priority: Medium
Category: Layout

Description:
The footer in Dev does not match design specifications. Problems: incorrect spacing between columns, misaligned column titles/links, footer height doesn't match Figma, social media icons spacing inconsistent, footer logo position incorrect, bottom legal text has wrong margins/alignment, divider lines incorrectly sized.

Expected Result:
Footer layout, spacing, alignment, and element positions should strictly follow design specifications exactly as shown in Figma.

Bug #21: Hover & Pressed States Not Implemented

Page: Global Footer
Priority: Low
Category: Interaction

Description:
Footer links do not have proper hover or pressed interaction states. Missing color transitions, underline behavior, and pressed-state styling defined in the design.

Expected Result:
All links should have fully implemented hover, pressed, and focus states matching the Figma interaction guidelines.

Bug #22: Icons Not in a Single Line

Page: Global Footer → Social Media section
Priority: Low
Category: Layout

Description:
Social media icons appear misaligned and break into multiple rows in Dev. The container width is not sufficient, causing icons to wrap.

Expected Result:
Icons should be on one single line. Container width must be expanded or spacing adjusted to prevent wrapping.

Bug #23: Footer Spacing & Layout Do Not Match Design

Page: Global Footer
Priority: Medium
Category: Layout

Description:
Columns spacing, padding, and section alignment differ from Figma. Footer height is incorrect. Bottom copyright/legal text block has wrong margins.

Expected Result:
Footer layout should be pixel-perfect with design specifications, including spacing, margins, and alignment.

Homepage Issues

Bug #24: Content Usefulness Survey Not Implemented

Page: All pages where "Was this page useful?" component should appear
Priority: Medium
Category: Functionality

Description:
The Content Usefulness Survey (the "Was this page useful? — Yes / No" component) is not implemented in Dev. Although UI of buttons appears on page, component has no functionality, logic, or connected endpoint.

Expected Result:
Clicking Yes or No should trigger survey logic (API submission or event tracking), provide immediate UI feedback (confirmation message, toast, or state change), and follow interaction behavior defined in design/system requirements.

Bug #25: Incorrect Text Size in Hero Section

Page: / (Homepage)
Section: Hero Section (Main Title & Subtitle)
Priority: High
Category: Typography

Description:
The text size in the Hero section on homepage does not match design specifications. Main headline and

subtitle appear with incorrect font sizes.

Expected Result:
Hero text should match exact font sizes defined in Figma design.

Bug #26: Incorrect Font Weight on All Titles

Page: Homepage – About SAIP section
Priority: Medium
Category: Typography

Description:
All title elements on this section are rendered with incorrect font weight in Dev environment. Typography does not match design system specifications, resulting in titles looking thinner or heavier than intended.

Expected Result:
All titles should use correct font weight as specified in design system.

Bug #27: Incorrect Hover State & Incorrect Card Dimensions

Page: Homepage – IP Categories Grid
Priority: Medium
Category: Component Styling

Description:
The cards representing IP categories (e.g., Patents, Trademarks, Designs) do not match design specifications in Dev. Two issues: (1) arrow button inside each card doesn't display correct hover state, (2) card sizes don't match design specifications.

Expected Result:
Hover state should match Figma design exactly and card dimensions should match design specifications.

Bug #28: Missing Text Section in Dev Environment

Page: Homepage → Main IP Services section
Priority: Medium
Category: Content

Description:
The text section under the "Main IP Services" title is missing in Dev implementation. In design, this section contains multiple paragraphs explaining the purpose of IP services, but in Dev this entire block is absent.

Expected Result:
Text block under "Main IP Services" should be fully implemented with all paragraphs, correct font size/color, and correct spacing/alignment.

Bug #29: Incorrect Border Radius for Button

Page: National IP Strategy → Latest News section
Component: "Go to Media to See More" button
Priority: Low
Category: Component Styling

Description:
The button's border radius in Dev environment does not match design specifications. In design, button should have fully rounded/specific radius style, but in Dev radius is either smaller, uneven, or visually incorrect.

Expected Result:
Button should follow exact border radius specified in design (fully rounded pill shape or specific standard radius like 8px/12px/16px).

Bug #30: Incorrect Max Width for Latest News Description Box

Page: Homepage (Latest News section)
Priority: Low
Category: Layout

Description:
Text container under "Latest news" title has incorrect maximum width. Design specification requires max-width of 720px, but in Dev it is implemented as 729px.

Expected Result:
Max-width should be exactly 720px according to design. Text box alignment and spacing should follow design grid and typography rules.

Bug #31: Incorrect Card Size in Dev Environment

Page: Homepage – Latest News Section
Priority: Medium
Category: Layout

Description:
The size of the news card in Dev environment does not match design specifications. Spacing, dimensions, and overall container proportions appear incorrect when compared to Figma component.

Expected Result:
Card must match exact design dimensions, including width, height, internal padding, image container size, text block spacing, button alignment, and all spacing tokens must follow design system.

Bug #32: Text Box Width and Height Are Incorrect in Dev

Page: Homepage → Latest News Card
Priority: Medium
Category: Layout

Description:
The text box inside news card does not match required width and height defined in design system. Text container appears stretched or misaligned, and inner spacing does not follow Figma component specifications.

Expected Result:
Text box should follow exact Figma component specifications: width must align with spacing rules, height should adjust automatically based on content within defined spacing constraints, padding should follow design system tokens.

National IP Strategy Page Issues

Bug #33: Left Text Width Incorrect Due to Image Width Layout Issue

Page: National IP Strategy → About NIPST section
Priority: Medium
Category: Layout

Description:
The image on right side has correct width, but this has caused text block on left side to shrink incorrectly. Text container does not follow layout grid or expected proportion defined in design.

Expected Result:
Layout should follow Figma structure: right image maintains correct width, left text block has correct max-width and grid alignment, both blocks maintain proportional layout defined in design system.

Bug #34: Incorrect Background Color in Dev

Page: National Strategy Objectives section
Priority: Medium
Category: Color

Description:
Background color used in National Strategy Objectives section does not match color defined in official design. Background appears lighter/darker, resulting in inconsistent visual appearance.

Expected Result:
Background color should match exact design token specified in NDS (National Design System).

Bug #35: Card Size Is Incorrect in Dev

Page: National IP Strategy → National strategy objectives section
Priority: Medium
Category: Layout

Description:
Size of objective cards in Dev environment does not match design specifications. Cards appear either wider, taller, or with incorrect padding/margins compared to Figma design.

Expected Result:
Card size should match exactly the component defined in Design System, including width, height, internal padding, corner radius, spacing between cards. All cards must be uniform and aligned according to grid system.

Bug #36: Incorrect Height and Width in "National Pillars" Section

Page: National IP Strategy → National Pillars section
Priority: Medium
Category: Layout

Description:
Height and width of "National Pillars" section items do not match design specifications. Layout in Dev is visually inconsistent with Figma component.

Expected Result:
All pillars must follow exact Figma dimensions: correct width, height, padding, and proper alignment and grid spacing.

Bug #37: Tab Color and Animation Not Correct in Dev

Page: National IP Strategy → National Pillars tab navigation
Priority: Medium
Category: Component Interaction

Description:
Color and animation of tab component in Dev do not match design specifications. Active tab color is incorrect, hover/pressed states differ from Figma, tab switching animation not implemented or behaves incorrectly.

Expected Result:
Tabs must follow official NDS behavior: correct active/inactive colors, hover and pressed states implemented according to Figma, smooth and correct tab switching animation.

Bug #38: Incorrect Button Color, Icon, and Border Radius in Dev

Page: National IP Strategy → National IP Strategy Document section
Priority: Low
Category: Component Styling

Description:
The buttons ("Show file" and "Download file") do not match design specifications. Button background color is incorrect, icon style doesn't match design, border radius differs from Figma component.

Expected Result:
Buttons must follow official Figma and NDS specs: correct background color (default, hover, pressed), correct icon size/color/weight, correct border radius according to design system.

Bug #39: Incorrect Image Size in Dev

Page: National IP Strategy → Main section image (photo_container)
Priority: Medium
Category: Media

Description:
Displayed image size does not match design specifications. In Dev, image appears either stretched, scaled incorrectly, or cropped differently compared to Figma layout.

Expected Result:
Image should follow exact size, aspect ratio, and cropping defined in Figma design. No distortion or unintended scaling.

Bug #40: Text Styling and Layout Incorrect on National Strategy Page

Page: `/saip/national-ip-strategy`
Component: News preview card under "Saudi Arabia Chairs the Diplomatic Conference on Design Law Treaty"
Priority: Medium
Category: Typography

Description:
Text block inside news preview card does not match design specifications. Issues: incorrect font size, font weight, line height, container width (text wraps differently than design), spacing doesn't match Figma, card layout inconsistent.

Expected Result:
Paragraph text should use correct design tokens: proper font-size, line-height, weight, and margins/padding. Card should exactly match Figma layout.

Bug #41: Same Styling Issues as Home Page Found on National IP Strategy Page

Page: `/saip/national-ip-strategy`
Section: Hero section / Titles / Typography / Layout
Priority: High
Category: Typography / Layout

Description:
National IP Strategy page contains same UI/UX issues previously identified on Home Page. Issues include inconsistencies in font size, weight, spacing, layout, and alignment when compared to Figma design.

Expected Result:
All typography and layout elements should match Figma specifications exactly.

SAIP Projects Page Issues

Bug #42: Breadcrumb Navigation Is Not Correct on SAIP Projects Page

Page: `/saip/saip-projects`
Priority: Medium
Category: Component Implementation

Description:
Breadcrumb component displayed on SAIP Projects page does not match design specifications and is not fully implemented according to Design System (NDS).

Expected Result:
Breadcrumb component should match Figma design with all elements properly implemented.

Bug #43: Hero Section Size and Font Size Are Not Correct in Dev

Page: `/saip/saip-projects`
Priority: High
Category: Layout / Typography

Description:
Hero section displayed at top of page does not match design specifications. There are discrepancies in spacing, height, typography, and overall layout.

Expected Result:
Hero section should match exact Figma specifications for size, spacing, and typography.

Bug #44: Button Color Is Not Correct in Dev

Page: SAIP Projects page
Priority: Low
Category: Component Styling

Description:
Button on this section does not follow correct color specified in design system. Background color, icon color, or hover/pressed states differ from Figma component.

Expected Result:
Button should use correct color tokens from design system for all states (default, hover, pressed).

Bug #45: Input Field Colors and Animation Are Not Correct in Dev

Page: SAIP Projects page
Priority: Medium
Category: Component Styling

Description:
Input fields do not match design specifications. Text color, placeholder color, border color, and focus/active state animation differ from NDS design system.

Expected Result:
Correct text and placeholder colors according to design tokens, correct border color in all states, proper

focus animation/transition as shown in Figma.

Bug #46: Additional Filters Are Not Implemented in Dev

Page: SAIP Projects page
Priority: Medium
Category: Functionality

Description:
The "Additional filters" section is missing or not functioning in Dev environment. Expand/collapse behavior, associated fields, and animations are not implemented as shown in design.

Expected Result:
"Additional filters" button should expand and collapse extra filter fields with correct animation and transition. All additional filter fields should appear with correct colors, styles, and spacing.

Bug #47: Box Width Is Not Correct in Dev

Page: SAIP Projects page
Priority: Medium
Category: Layout

Description:
Width of project information box is not matching design specifications. In Dev environment, box appears either too narrow or too wide compared to provided layout.

Expected Result:
Box width should match exact width defined in design. Spacing, padding, and alignment inside box should be consistent with UI guidelines.

Bug #48: Subtitle Font Size Is Not Correct in Dev

Page: SAIP Projects page
Priority: Medium
Category: Typography

Description:
Subtitle text (e.g., "Bid submission deadline") is not using correct font size in Dev environment. Current size differs from design specifications, causing inconsistency in hierarchy and visual alignment.

Expected Result:
Subtitle font size should match exact size defined in design system. Typography hierarchy between title, subtitle, and body text should remain consistent.

Organizational Structure Page Issues

Bug #49: Container and Image Size Are Not Correct in Dev

Page: Organisational Structure
Priority: Medium
Category: Layout

Description:
Container size and image size in section are not matching design specifications. In Dev environment, component appears either too large or too small, causing layout misalignment and incorrect spacing.

Expected Result:
Container and image sizes should match exact Figma specifications.

Bug #50: Text Color Is Not Correct in Dev

Page: Organisational Structure → Board of Directors section
Priority: Low
Category: Color

Description:
Text color for "Her Excellency" title is not matching design. In Dev environment, color appears darker/lighter or uses different shade compared to design system.

Expected Result:
Text color must use correct color token defined in design system (e.g., on-background, text-primary, or defined HEX value).

Bug #51: Card/Picture Size and Name Typography Not Correct in Dev

Page: Organisational Structure → Board Members section
Priority: Medium
Category: Layout / Typography

Description:
Card layout for board members is not aligned with design. Two issues: (1) card/picture size is not correct, (2) font size and weight for member's name are incorrect.

Expected Result:
Card/picture size should match Figma specifications. Member name typography should use correct font size and weight.

Bug #52: Text Container Size Is Not Correct in Dev

Page: Organisational Structure → Advisory Board section
Priority: Medium
Category: Layout

Description:
Text block under "Advisory board" heading does not match design specifications. Text container width/size is not correct in Dev — box is either wider, narrower, or misaligned.

Expected Result:
Text block should use exact width defined in design (including margins, padding, and max-width). Text wrapping, spacing, and alignment should match Figma exactly.

Bug #53: Text Box Width Is Not Correct in Dev

Page: Organizational Structure
Priority: Medium
Category: Layout

Description:
Width of main title text box ("Organizational structure") does not match design specifications. Container is either too wide, too narrow, or misaligned compared to Figma layout.

Expected Result:
Text box should follow exact width defined in Figma (including margins, grid alignment, and max-width constraints).

Bug #54: Text Box Width and Font Color Are Not Correct in Dev

Page: Organizational Structure
Section: Introductory paragraph under page title ("You can navigate through the chart…")
Priority: Medium
Category: Layout / Color

Description:
Width of text box for introductory paragraph does not match design. Additionally, font color of text is incorrect compared to Figma design specifications.

Expected Result:
Text box width should match exact layout defined in Figma (grid alignment, margins, max width). Font color should match design token used in Figma.

Entities & Partners Page Issues

Bug #55: Incorrect Font Size and Weight in Dev

Page: Entities & Partners → National partners section
Affected Elements: Section title: "Government sector"
Priority: Medium
Category: Typography

Description:
Font size and font weight applied to subsection title "Government sector" do not match design specifications in Figma. Text appears visually different from required design style.

Expected Result:
Typography should match design tokens exactly: correct font size, correct font weight (Semibold / Medium /

Regular depending on Figma), proper letter spacing, line height, and style.

Bug #56: Incorrect Container Width in Dev

Page: Entities & Partners → National partners → Government sector section
Priority: Medium
Category: Layout

Description:
Width of container for "Government sector" section does not match design specifications. Container appears either too wide, too narrow, or misaligned compared to intended Figma layout.

Expected Result:
Container width should match exact Figma specification, including correct max-width, correct padding and margins, proper alignment inside grid system.

Bug #57: Font Size Not Correct in Dev

Page: Entities & Partners → National partners → Government sector → Individual entity cards
Component: Entity card title (e.g., "Communications, Space and Technology Commission")
Priority: Medium
Category: Typography

Description:
Font size of entity title in development environment does not match Figma design. Text appears either larger, smaller, or with incorrect line height compared to required design specification.

Expected Result:
Title should follow exact Figma typography specs, including correct font size, font weight, line height, and letter spacing.

Bug #58: Incorrect Button Radius, Icon Size, and Icon/Text Gap

Page: Entities & Partners → National partners → Universities
Component: "Go to website" button inside each university card
Priority: Low
Category: Component Styling

Description:
Styling of CTA button ("Go to website") in Dev does not match Figma specifications. Button border-radius differs from design, icon size is incorrect, spacing between icon and text doesn't match Figma-defined gap.

Expected Result:
Button should follow exact Figma component specs, including correct radius, correct icon size, correct padding and spacing between icon and text.

Services Overview Page Issues

Bug #59: Excess Spacing Between Quick Navigation and Below Title

Page: Services → Services overview
Section: Quick Navigation (tab bar) → "Discover services" title
Priority: Low
Category: Layout

Description:
Vertical spacing between Quick Navigation bar and title below it ("Discover services") is noticeably larger in Dev compared to Figma design. This causes layout to appear misaligned and creates unnecessary empty space.

Expected Result:
Spacing should match Figma spacing token used (e.g., spacing-lg). Quick Navigation and title should align visually with consistent vertical rhythm.

Bug #60: Incorrect Font Size & Weight

Page: Services → Services overview
Section: Title: "Discover services"
Priority: Medium
Category: Typography

Description:
Font size and font weight of "Discover services" heading in Dev environment do not match Figma design. Text appears visually different and does not follow specified typography scale.

Expected Result:
Font size should exactly match Figma typography (e.g., Display L / 48px or whichever is used). Font weight should also match design spec (e.g., 700 / Bold or 600 / SemiBold).

Bug #61: Divider Component Not Implemented Correctly

Page: Services overview
Section: Below "Discover services" title
Priority: Low
Category: Component Implementation

Description:
Divider element is not implemented correctly in Dev environment. Currently appears as solid border applied to container, but it should be stand-alone divider component consistent with Figma design system.

Expected Result:
Divider should be implemented as separate divider component, not as border. It should follow design specifications for thickness, color, width, position, and spacing above/below.

Bug #62: Incorrect Font Size and Weight

Section: IP Protection & Management (Services overview page)
Priority: Medium
Category: Typography

Description:
Font size and weight for section title "IP Protection & Management" in Dev environment does not match Figma design. Text appears with incorrect font size and weight, breaking visual hierarchy.

Expected Result:
Correct font size for this heading (e.g., Heading L / Heading XL depending on design system) and correct font weight (e.g., 600 / 700 as defined in typography guidelines).

Bug #63: Font Size and Weight Are Not Correct in Dev

Section: Information you might need — heading
Priority: Medium
Category: Typography

Description:
Font size and font weight of heading in Dev environment do not match values defined in Figma design. Heading appears with incorrect size and/or weight.

Expected Result:
Heading should use correct typography token (font size + weight) from design system. Visual hierarchy must match Figma specs.

Bug #64: TAB Height, Width, Color, and Animation Not Correct in Dev

Section: Tabs component (e.g., "IP Services Information", "Trademark Information", etc.)
Priority: Medium
Category: Component Styling / Interaction

Description:
TAB component does not match Figma design in multiple aspects. TAB height differs from Figma, width is larger/smaller than design, colors don't match expected design tokens, underline/active-state animation is missing or implemented incorrectly.

Expected Result:
Height should follow exact spacing and dimensions from design system. Width should align with Figma layout. Color states (default, hover, active, pressed, disabled) must match design tokens. Active indicator / underline animation should follow Figma motion specs.

Bug #65: Extra Title Appearing in Dev + Incorrect Text Color & Padding

Section: Digital guide promotional box
Priority: Medium
Category: Content / Layout

Description:
There is an extra title/heading in Dev environment that does not exist in Figma design. Additionally, text color and left padding of content inside this section do not match design specifications.

Expected Result:
No title should appear above this content block. Text color should follow correct design token. Left padding should match spacing defined in component.

Bug #66: Image Size Not Correct in Dev

Section: Services overview → IP protection & management
Priority: Medium
Category: Media

Description:
Image size displayed in Dev environment does not match size defined in Figma design. Image appears to be scaled incorrectly (either too large, too small, or wrong aspect ratio).

Expected Result:
Image should follow exact width and height specified in component design. Aspect ratio must be preserved. Spacing around image must match layout structure in Figma.

Bug #67: Multi-Line Text Formatting & Font Weight Not Implemented in Dev

Section: Services overview → IP protection & management → Intro text under main title
Priority: Medium
Category: Typography / Content

Description:
Multi-line text block ("The six main IP services are: …") is not displayed in Dev the same way as in Figma design. Line breaks are missing or different in Dev, and font weight for specific words (e.g., bold category names) is not correctly applied.

Expected Result:
Text should break into multiple lines exactly as specified. Category names (Patents, Trademarks, Copyrights, etc.) must be bold. Typography settings (font size, weight, line height, letter spacing) should match design.

Contact & Support Validation

Bug #68: Character Limit Validation Messages

Page: Contact & Support page
Priority: Medium
Category: Form Validation

Description:
The following character limit validation messages need to be displayed for form fields:

- "Your name cannot exceed 50 characters."
- "Your email cannot exceed 100 characters."
- "Your message cannot exceed 2,000 characters."

Expected Result:
These validation messages should appear when users exceed the character limits for respective fields.
